Journal of Sedimentary Petrology

INDEX TO VOLUME 34

A classification of common sandstones: comment on a paper by Earle F. McBride 696
A comparison of two techniques for measuring shale compaction 694
A directional structure from the Lower Jurassic of Great Britain 692
A method for permanent mounting of powder samples for X-ray diffraction analyses 848
A new and important occurrence of sedimentary analcime 761
A new system for the cataloguing and storage of sedimentary rocks based on lithologic and genetic characteristics 344
A new term: "Perigenic" 875
A note on a new type of conical structure in shale 680
"A note on some possible misinformation from cores obtained by piston-coring devices," discussion of 699
A note on thin section mechanical analysis 194
An unusual sedimentary structure from the Carmel Formation 884
A quantitative separation of non-carbonate minerals from carbonate minerals 412
A rapid method of making replicas of rock and mineral surfaces for use in electron microscopy 604
"A Symposium: Shelf Carbonates of the Paradox Basin," review of 447
A technique for the study of surface textures of sand grains with electron microscopy 423
Acids, amino, in basin sediments 433
Alabama and Georgia, Lookout Mountain, Lower Pennsylvanian Sewanee sandstone, Petrology of 46
Alaska, Barrow, floating sand and pebbles near 532
Alberta, Cretaceous and Tertiary sandstones, authigenic clay mineral cements in 461
Algae, contributors to the formation of calcareous tufa, Mono Lake, California 309
Allen, J. R. L., note by 660
Allen, P., article by 289
Alluvial fan, southern Nevada, sedimentation of 395
Altschaeffl, A. G., Harrison, W., and Lynch, M. P., article by 727
Amino acids in basin sediments 433
Amino acids in some aquatic plants and associated freshwater sediments, relative abundance and order of stability of 25
Analcime-bearing pyroclastic and sedimentary rocks from New South Wales 543
Analcime, sedimentary, a new and important occurrence 761
Analysis of vectorial data, available methods for 440
Anhydrite and gypsum, origin and diagenesis of 512
Antarctic peninsula traverse, petrology of rocks collected on 360
Application of Rosin's distribution in size-frequency analysis of clastic rocks 483
Aquatic plants and associated freshwater sediments, relative abundance and order of stability of amino acids in 25
Aquatic plants and associated lake and bay sediments, chlorinoid and flavinoid pigments from 561
Authigenic clay mineral cements in Cretaceous and Tertiary sandstones of Alberta 461
Authigenic kaolinite in sandstone 102
Available methods for the analysis of vectorial data 440
Available methods for the analysis of vectorial data; a reply 441

Ballance, P. F., article by 91
Barbados, chemical and mineralogical studies of siliceous earth from 687
Barchan dunes, subaqueous river channel 694
Barrett, P. J., article by 524
Barrow, Alaska, floating sand and pebbles near 532
Bass, R. O., ed., and Sharps, S. L., assist. ed., "A Symposium: Shelf Carbonates of the Paradox Basin," review of 447
Basumallick, Sudhir, note by 194
Bay of Fundy and Dutch Wadden Sea tidal flats, sediments, comparison of 18
Beach cusp and beach ridge formation on the Long Island Sound, observation of 554
Beach dune environment, Sapelo Island, Georgia, Eolian cross-bedding in 389
Beach marks, rhomboid, observations on 683
Beach material during cusp formati on, tank experiments on the sorting of 112
Beavers, A. H., and Jones, R. L., article by 881
Bedding character in conglomerates and sandstones, deduction of flow regime from 656
Bed-sequences, graded, cross-laminations in 379
Behrendt, J. C., Christensen, N. J., and Laudon, T. S., article by 360
"Beitrag zur Petrographie der Oberharzer Kulmgrauwacke (Contribution to the petrography of the Upper Harz Culm graywacke)," review of 446
Bever, J. E., and Martin, W. D., article by 344
Bird Spring Group, southern Nevada, carbonate rocks, petrographic classification and method of description of 365
Bloom, A. L., article by 599
Bluck, B. J., article by 395
Boekschoten, G. J., note by 422
Bottom sediments of Saginaw Bay, Michigan 173
Bouma, A. H., article by 349
Box-type sediment-coring device 185
Braitsch, Otto, "Entstehung und Stoffbestand der Salzlagerstatten," review of 446
Brown, P. R., article by 254
Burns, R. E., discussion by 699

Calcareous sediments, fluorescence method for detection of phosphatization in 691
Calcareous tufa, Mono Lake, California; algae, contributors to the formation of 309
Calcite-dolomite ratios, determination of by infrared spectroscopy 676
Caliche cemented terrace gravels, fracturing of sandstone cobbles in 887
Caliche of central and southern Llano Estacado, Texas 669

Brown, P. R., article by 254
Burns, R. E., discussion by 699

Calcareous sediments, fluorescence method for detection of phosphatization in 691
Calcareous tufa, Mono Lake, California; algae, contributors to the formation of 309
Calcite-dolomite ratios, determination of by infrared spectroscopy 676
Caliche cemented terrace gravels, fracturing of sandstone cobbles in 887
Caliche of central and southern Llano Estacado, Texas 669

California, Mono Lake; algae, contributors to the formation of calcareous tufa 309
California, portion of western Marin County, Franciscan Formation, orthoclase distribution and authigenesis in 335
Callis, C. F., and Irani, R. R., "Particle Size: Measurement, Interpretation and Application," review of 444
Cambrian manganese carbonate rocks, North Wales, genesis of 819
Carbon isotopic composition of siderite nodules in some shales of Pennsylvanian age, paleoenvironmental significance of 814
Carbonate minerals, quantitative separation of non-carbonate minerals from 412
Carbonate rocks, Bird Spring Group, southern Nevada, petrographic classification and method of description of 365
Carbonate sediments, early diagenesis and lithification in 777
Carbonate sediments in the Heron Island Reef, differentiation of 294
Carozzi, A. V., review by 446
Carrigy, M. A., and Mellon, G. B., article by .. 461
Carroll, Dorothy, article by 537
Cataloguing and storage of sedimentary rocks based on lithologic and genetic characteristics, new system for 344
Cause of hatchured weathering patterns produced on dolomite 197
Cementation and compaction of the millstone grit of the Central Pennines, England 756
Central and southern Llano Estacado, Texas, caliche of 669
Central Pennines, England, Millstone grit, cementation and compaction of 756
Characterization and differentiation of loess, magnetic susceptibility as an aid in 881
Chemical and mineralogical studies of siliceous earth from Barbados 687
Chen, C. S., and Goodell, H. G., article by 46
Chloride ion concentration in liquid inclusions of carbonate rocks as a possible environmental indicator 677
Chlorinoid and flavinoid pigments from aquatic plants and associated lake and bay sediments 561
Christensen, N. J., Laudon T. S., and Behrendt, J. C., article by 360
Classification of common sandstones: comment on a paper by Earle F. McBride 696
Classification, petrographic, and method of description of carbonate rocks of the Bird Spring Group in southern Nevada 365
Clastic rocks, application of Rosin's distribution in size-frequency analysis of 483
Clastic sediments, depositional mechanisms from the size analysis of 73
Clay mineral cements, authigenic, in Cretaceous and Tertiary sandstones of Alberta 461
Clay minerals of the Silurian Clinton Ironstones, New York State 855
Coastal marsh, Connecticut, peat accumulation and compaction in a 599
Colorado Plateau, Eolian varving in 429
Comment on a paper by Earl F. McBride: a classification of common sandstones 696
Comparison of sediments from Bay of Fundy and Dutch Wadden Sea tidal flats 18
Comparison of two techniques for measuring shale compaction 694
Composition of sediments in cores from the Experimental Mohole Project (Guadalupe site) 633
Concept of the sedimentation unit, interpreting 165
Concretions and geodes from the Mississippian Warsaw Formation, Keokuk region, Iowa, Illinois, Missouri 123
Conglomerates and sandstones, deduction of flow regime from bedding character in 656
Conical structure in shale, a note on a new type of 680
Connecticut coastal marsh, peat accumulation and compaction in a 599
Cored sediments, Sabine Lake and adjacent water bodies, Texas-Louisiana, minor internal sedimentary structures in 419
Cretaceous and Tertiary sandstones of Alberta, authigenic clay mineral cements in 461
Crook, K. A. W., discussion by 696
Cross-laminations in graded bed sequences ... 379
Cross-bedding, Eolian, in the beach dune environment, Sapelo Island, Georgia 389
Cusp formation, tank experiments on the sorting of beach material during 112

Deduction of flow regime from bedding character in conglomerates and sandstones 656
Deininger, R. W., article by 281
Depositional mechanisms from the size analysis of clastic sediments 73
Description of carbonate rocks, Bird Spring Group, southern Nevada, petrographic classification and method of 365
Determination of calcite-dolomite ratios by infrared spectroscopy 676
Diagenesis and lithification, early, in carbonate sediments 777
Diagenesis and origin of gypsum and anhydrite 512
Diagenetic textures, universal stage in studies of 851
Differentiation of carbonate sediments in the Heron Island Reef 294
Directional structure from the Lower Jurassic of Great Britain 692
Discussion of "A note on some possible misinformation from cores obtained by piston-coring devices 699
Distribution and authigenesis, orthoclase, Franciscan Formation, portion of Western Marin County, California 335
Dolomite, cause of hatchured weathering patterns produced on 197
Dorset, England, Upper Jurassic beds, petrography and origin of 254
Dott, R. H., Jr., article by 625
Duane, D. B., article by 864
Dunes, subaqueous river channel barchan 694
Dustfall, eastern Atlantic, February, 1962, observations on 355
Dutch Wadden Sea tidal flats and Bay of Fundy, sediments, comparison of 18

Early diagenesis and lithification in carbonate sediments 777
Eastern Atlantic, February, 1962, observations on a dustfall in 355
Ehrlich, Robert, note by 437
Electron microscopy, rapid method of making replicas of rock and mineral surfaces for use in 604
Electron microscopy, technique for study of surface textures of sand grains with 423
Ellingboe, John, and Wilson, James, article by 412

Pyroclastic and sedimentary rocks from New South Wales, some analcime-bearing..... 543

Quantitative insoluble residue procedures..... 666
Quantitative separation of non-carbonate minerals from carbonate minerals..... 412
Quartz, undulatory and polycrystalline: a discussion..... 443

Rapid method of making replicas of rock and mineral surfaces for use in electron microscopy..... 604
Rapid Phi-millimeter conversion by ordinary slide rule..... 658
Reeves, C. C., Jr., note by..... 190
Reeves, C. C., Jr., and Suggs, J. D., note by... 669
Relative abundance and order of stability of amino acids in some aquatic plants and associated freshwater sediments..... 25
Remarks on the Phi notation..... 195
Removal of iron oxide in thin sections..... 198
Replicas of rock and mineral surfaces for use in electron microscopy, rapid method of making..... 604
Reply to Heezen's discussion..... 699
Residual seams and cementation in Oligocene shell calcarenites, Te Kuiti Group, New Zealand..... 524
Residue, insoluble, quantitative procedures... 666
Retiring editor of the Journal of Sedimentary Petrology..... 711
Rhomboid beach marks, observations on..... 683
Rhyolite sand grains, glauconitization of..... 84
Rich, Mark, article by..... 365
Richardson, E. S., Jr., and Zangerl, R., "The Paleoecological History of Two Pennsylvanian Black Shales," review of..... 445
Ripple marks, Eolian, in sandstone..... 432
River channel barchan dunes, subaqueous..... 694
Roberson, H. E., article by..... 401
Rocks, sedimentary, normative illite in..... 427
Rohtasgarh, India, Vindhyan rocks, petrology. 270
Rosin's distribution in size-frequency analysis of clastic rocks, application of..... 483
Ruotsala, A. P., note by..... 676

Sabine Lake and adjacent water bodies, Texas-Louisiana, minor internal sedimentary structures in cored sediments of..... 419
Saginaw Bay, Michigan, bottom sediments of.. 173
Sahu, B. K., articles by.....73, 768
Saltman, Paul, Stitt, Clyde, and Emery, K. O., note by..... 433
Sampling and treatment of unconsolidated sediments for study of internal structures.... 349
Sampling plans for sediments, role of homogeneous unit..... 437
Sampling variability of Paleocurrent cross-bed data in the Post-Myrick Station Channel sandstone (Pennsylvanian), Missouri..... 774
Sand grains, rhyolite, glauconitization of..... 84
Sand grains, surface textures, technique for study with electron microscopy..... 423
Sand grain surfaces, partial immersion technique for the photography of..... 473
Sanders, J. E., and Klein, G. DeV., article by.. 18
Sandstone, authogenic kaolinite in..... 102
Sandstone cobbles in caliche cemented terrace gravels, fracturing of..... 887
Sandstone, Eolian ripple marks in..... 432
Sandstone hillside, sedimentary properties and processes on..... 328
Sandstones and conglomerates, deduction of flow regime from bedding character in..... 656
Sandstones, classification of common: comment on a paper by Earle F. McBride..... 696
Sandstones, Miocene turbidity current, California, grain orientation and imbrication in 229

Sandstone reefs of Pernambuco, (Northeastern Brazil), origin and age of 715
Sapelo Island, Georgia, Eolian cross-bedding in the beach dune environment of 389
Schoen, Robert, article by 855
Scholl, D. W., and Taft, W. H., article by 309
Sedimentary analcime, a new and important occurrence 761
Sedimentary facies in the lower Allegheny rocks of western Pennsylvania 610
Sedimentary properties and processes on a sandstone hillside 328
Sedimentary rocks, new system for cataloguing and storage of, based on lithologic and genetic characteristics 344
Sedimentary rocks, normative illite in 427
Sedimentary structures, minor internal, in cored sediments, Sabine Lake and adjacent water bodies, Texas-Louisiana 491
Sedimentary structure, unusual, from the Carmel Formation 884
Sedimentation of an alluvial fan in southern Nevada 395
Sedimentation unit, interpreting the concept of 165
Sediment-coring device, box-type 185
Sedimentological models 289
Sediments, basin, amino acids in 433
Sediments, bottom, Saginaw Bay, Michigan ... 173
Sediments, carbonate, Heron Island Reef, differentiation of 294
Sediments, clastic, depositional mechanisms from the size analysis of 73
Sediments, clastic, transformation of weight frequency and number frequency data in size distribution studies of 768
Sediments, dearth of certain sizes of materials in 320
Sediments from Bay of Fundy and Dutch Wadden Sea tidal flats, comparison of 18
Sediments from the Experimental Mohole, Guadalupe site, ion-exchange capacity of 537
Sediments in cores from the Experimental Mohole Project (Guadalupe site), composition of 633
Sediment size distributions, modification of 156
Sediments of Lower Chesapeake Bay, with emphasis on mass properties 727
Sediments of St. Andrew Bay, Florida, the prediction of strength in 134
Sediments, recent, Western Pamlico Sound, North Carolina, significance of skewness in 864
Sediments, role of homogeneous unit in sampling plans for 437
Sediments, unconsolidated, sampling and treatment for study of internal structures 347
Seif dune and associated deposits in Libya, primary structures of 5
Separation, quantitative, of non-carbonate minerals from carbonate minerals 412
S.E.P.M., membership list 199
S.E.P.M., minutes and reports of annual meeting 199
S.E.P.M., records and activities 199, 449, 702
Shale compaction, a comparison of two techniques for measuring 694
Shale, note on a new type of conical structure in 680
Shales, Pennsylvanian age, paleoenvironmental significance of carbon isotopic composition of siderite nodules in 814
Sharps, S. L., assist. ed., and Bass, R. O., ed., "A Symposium: Shelf Carbonates of the Paradox Basin," review of 447
Shelton, J. W., article by 102
Shoji, Rikii, and Folk, R. L., article by 144
Siderite nodules in some shales of Pennsylvanian age, paleoenvironmental significance of carbon isotopic composition of 814
Significance of skewness in recent sediments, Western Pamlico Sound, North Carolina .. 864
Siliceous earth from Barbados, chemical and mineralogical studies of 687
Silurian Clinton Ironstones, New York State, clay minerals of 855
Size analysis of clastic sediments, depositional mechanisms from 73
Size distribution studies of clastic sediments, transformation of weight frequency and number frequency in 768
Size-frequency analysis of clastic rocks, application of Rosin's distribution in 483
Sizes of materials in sediments, dearth of certain 320
Skewness in recent sediments, Western Pamlico Sound, North Carolina, significance of ... 864
Society records and Activities: See S.E.P.M.... 199
Society records and Activities: See S.E.P.M.... 449
Society records and Activities: See S.E.P.M.... 702
Some analcime-bearing pyroclastic and sedimentary rocks from New South Wales 543
Some aquatic plants and associated freshwater sediments, relative abundance and order of stability of amino acids in 25
Some remarks on the Phi notation 195
Sorting of beach material during cusp formation, tank experiments on 112
Southern Nevada, alluvial fan, sedimentation of 395
Spectroscopy, infrared, determination of calcite-dolomite ratios by 676
Spotts, J. H., article by 229
St. Andrew Bay, Florida, sediments, the prediction of strength in 134
Stanley, D. J., note by 672
Steinmetz, Richard, discussion by 441
Stitt, Clyde, Emery, K. O., and Saltman, Paul, note by 433
Stokes, W. L., note by 429
Streaked-out mud ripples below Miocene turbidites, Puriri Formation, New Zealand 91
Strength in the sediments of St. Andrew Bay, Florida, the prediction of 134
Structure, directional, from the Lower Jurassic of Great Britain 692
Structures, internal, sampling and treatment of unconsolidated sediments for study of 349
Structures, network, similar to those made by tadpoles 664
Structures, primary, seif dune and associated deposits in Libya 5
Structures, tadpole 422
Studies of diagenetic textures, universal stage in 851
Studies of siliceous earth from Barbados, chemical and mineralogical 687
Subaqueous river channel barchan dunes 694
Suggs, J. D., and Reeves, C. C., Jr., note by ... 669
Surface morphology of some limestone types as revealed by electron microscope 144
Swain, F. M., Ting, Francis, and Paulsen, G. W., article by 561
Swain, F. M., Ting, Francis, and Venteris, Gunta, article by 25
Swett, Keene, article by 615
System, new, for the cataloguing and storage of sedimentary rocks based on lithologic and genetic characteristics 344

Tadpoles, network structures similar to those made by 664
Tadpole structures again 422
